

## Injector Removal Kit - for VAG

This tool kit assists the removal and installation of the high pressure petrol injectors used on direct injection VAG engines. Designed to help prevent damage to the injectors.

### Additional Information

- Kit includes: double jaw puller, U-shaped puller, slide hammer, tapered tool and sleeve, 2 x seal adaptors and injector installer.
- Tools are also included for the installation of the injector seals - important to ensure a good seal.
- Equivalent to OEM T10133.
- For later models please see our updated kit, Part No. 8274.
