

Coolant Cap Tool - for Ford, Mazda, Volvo

Coolant cap tool Ford/Mazda/Volvo 13mm hex drive

Additional Information

- Specially developed for Ford, Mazda & Volvo where the coolant tank is housed under the bulkhead in a confined area making access for removal by hand difficult
- Constant heating and cooling in use makes the seals of the cap stick further adding to the removal issue
- Manufactured from lightweight aluminium to help prevent damage to the plastic coolant cap. The cap wrench can be used with a 13mm spanner.
- Time saver and prevents scuffed knuckles
- Made in Germany. Exclusive to Laser Tools
