

## **Two Pole Voltage Tester 12 - 600V**

Two pole voltage tester 12 - 600V DC/AC CAT III. Designed to be used to prove the absence or presence of voltage in a circuit before and after working on the circuit. Can be used on circuits up to 600 volts found on hybrid and battery electric vehicles.

## **Additional Information**

- Two pole voltage tester. Used to prove absence &/or presence of voltage on hybrid and battery electric vehicles.
- · CAT III 12 600V DC/AC with LED display.
- · Simple and easy to use; no batteries required.
- · Always perform self test on known voltage source before use.
- · CE & UKCA compliant; GS certified.
