

LTR Handlebar Holder

Designed to keep bars steady and inline while carrying out maintenance on a bicycle. This handlebar holder is ideal for when the bike is being hung in a workstand. By hooking over both the top tube and the bars it prevents the front of the bike from turning whilst being worked on.

Additional Information

- Ensures the handlebar & front wheel remain still.
- Protective coating to prevent scratching.
- Supplied with a hook & loop strap to secure in place.
- Fits handlebars up to 32mm diameter & top tubes up to 50mm diameter.
- Recommended for when using a workstand, please see Laser Part No. 8193.
