

Hub Cleaner 1/2"D

A wheel hub cleaning tool, designed for use on studless hubs, to remove corrosion and dirt from the mating surface on both the hub and the inside of the wheel, in preparation of refitting the wheels to the vehicle. It features a 1/2" square drive, enabling it to be fitted to the same impact wrench/air gun that was used to remove the wheel nuts (only requires light contact pressure for best results). It has an external diameter of 150mm, and an internal diameter of 90mm, and features a replaceable abrasive pad (available separately, Part No. 8809).

Additional Information

- 150mm diameter cleaning disc, for cleaning stud-less hubs with a maximum centre boss of 85mm.
- Removes corrosion & dirt from hubs, together with the hub side of the wheel.
- Features a composite body, metal 1/2"D insert, together with a hook & loop abrasive pad fixing.
- Use with a 1/2"D impact gun or power tools. Maximum speed 1500 rpm.
- Replacement abrasive pads available, please see Part No. 8809.
